# HooHacks Mentor System – Hacker Edition

Thank you so much for coming and participating in HooHacks 2019! We are using a new mentoring system and want to give you a quick tutorial on using our system.

Step 1 – Go to the Mentor System located at https://hoohacks-mentors.herokuapp.com. You should see our home page.

Step 2 – Login by clicking the **Login with GitHub** button. When you click this, you will be asked to login to your GitHub account and accept sharing your information (name and email address) with our system.

Step 3 – Once you have logged in, you can submit a mentor request ticket. When you are describing the problem, please make sure to include both the problem (from a high level) and the platform. Please do not create any bogus tickets – if you do this you will be banned from using the system.

Step 4 – Wait! Mentors will be actively looking at this queue to see if they can help you.

Step 5 – Once your mentor closes the ticket, you will have the option of rating the mentor. This will allow the mentor to understand how they can better help their next team.

Thanks for participating HooHacks 2019!
